**ICE LEVERS, CABLES, AND
CALIPERS FOR CALLISTO
MIRRORED MECHANICAL DISC
BRAKES**

From: \$132.83

Front suspension ICE trikes require mirrored brakes.

Some people found the older Tekro Hydraulic brakes troublesome to maintain.

This kit contains what you'll need to convert a trike to the new type Callisto mechanical disc brakes that ICE offers on their current trikes.

When it's time to replace the pads, you have a choice of easy to find standard Shimano pads. For example: G03A (resin), G04S (metal), J03A (resin with fin) or J04C (metal with fin).

Brake cables are included by default, but don't forget to get new shift cables if you need to take bar-end shifters off to install these brake levers.

The calipers are available individually, if you don't need a full kit.
