**ICE QUICK RELEASE (QR) FOR
BOOM (PAIR)**

\$30.00

Pair of QR levers for front boom. These quick releases allow the front boom to be quickly collapsed for extreme folding and for the leg length of the trike to be adjust very slightly.

However, as they do not adjust the chain length (for that you need the ICE Easy Adjust kit, which already includes these clamps), they should not be used to adjust the trike for different riders.
