ICE SEATS, MESH

From: \$399.00

The ICE seat frame is designed with breathable fabrics to optimize airflow, providing maximum comfort. Additionally, the base and sides feature ergonomic extra cushioning, further enhancing the overall comfort level. The tension in the back can be easily adjusted to accommodate the rider's preference. With the integration of Integral Sidepod mounts, the need for over-the-seat Sidepod straps is eliminated. For added convenience, there is a weather-sealed pocket on the top, ideal for storing small items like keys and phones. Reflective side detailing ensures visibility and safety during nighttime rides. An optional neck rest is also available to provide even greater comfort for the rider.

Includes mesh seat cover and seat frame, complete with mounts: Includes ICE lower Seat Clamps and ICE Seat Mount Adjuster with clamps.

If you're looking to upgrade or replace you ICE trike's seat, you probably only need new mesh fabric to install on your existing seat frame.
