**TERRACYCLE BAR END SHIFTER
MOUNT**

\$98.00

This mount uses a special clamp with a Cable Tunnel in it that attaches to the end of your handlebars right under your Bar End Shifters. The clamp goes forward and inward a little bit and holds mounting tube that goes up and then out. Since the clamp goes inward a little bit, your hands slide right past it. You'll barely notice it's there as you go from braking to shifting and back.
